The following is an examiner's statement of reasons for allowance: the prior art fails to anticipate the combination of a seal for a rolling bearing, as set forth in claims 1 and 2, and most significantly requires a separate sealing a separate sealing medium being provided between the sealing plate and the hub and the sealing plate being internally tightly connected by means of an elastic seal or an elastic medium to the housing at least a bracing force of the elastic seal being reduced as the rotational speed of the roller bearing ring increases and in claim 2, a separate elastic sealing medium being used in a fitting space between the hub and the rim of the sealing cap on the front face of the roller bearing, an axial accommodation between the sealing cap and the hub.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
